Re-organization of the Public Health Departm

RDER No. G. 6680-730—SANY. 55-27-34, DATED 28TH

The question of revising the arrangements for the cont
ties in the State has been under the consideration of Gover
On the arrival of Dr. Sweet, whose services have been
national Health Division of the Rockefeller Foundation, he
rnment to examine the position and formulate a scheme suited to
Sweet has accordingly submitted detailed proposals in the m
ares of his proposals are :—

(1) The separation of the Sanitary Department from the Medical.
(2) The division of the Department of Health into Bureaus dealing with differ
Public Health activity.
(3) The establishment of local units under competent Health Officers in Taluks a
palities and the appointment of District Health Officers ; and
(4) The continuance of the Health Officers as at present for certain of the larger Mun
and special areas such as the Kolar Gold Field.

2. Government are in accord with the general lines of reorganization out
They consider that the re-modelling of the Department in the ma
ted by Dr. Sweet will result in an all-round improvement of the sanitary con
the State. In view, however, of the fact that an immediate expenditure of ove
hs of rupees would be required to carry out the proposed scheme in its entirety,
nment are of opinion that it would be given effect to gradually, as funds permit,
ey are pleased to pass the following orders for the present.

The Sanitary Department has already been separated from the Medical by
pointment of a whole-time Sanitary Commissioner, in Government Order
6-3718– C. B. 135-28-2, dated 18th February 1929. The Sanitary Depart-
l hereafter be known as the Department of Health and the Sanitary Commis-
signated as Director of Health. He will be the chief controlling authority
epartment of Health.

The Central Sanitary Board which was constituted in Government Order
3-63—San. 86-13-25, dated the 8th February 1917, and subsequently
zed under Government Order No. G. 86-144—San. 25-24-3, dated the 6th
7, will have its operations extended and will act as a Central Health Com-
l advise the Department in all important Health matters. It will meet at
in six months and oftener if the Chairman deems it necessary. In addition
ies now assigned to it, the Central Health Committee will receive reports of
g of the Health Department, consider and advise Government on matters of
Health work, and act as a general consultative and advisory body. It will
the Director of Health, the Senior Surgeon and representatives of the
Foundation (as long as they are available), the Chief Engineer of Mysore,
qualified in Health matters but not holding current appointments in the
of Health, and one member of the Legislative Council and one of the
Assembly. These members will be nominated by Government. The
ealth will be the Chairman of the Committee and the Health Officer,
the Secretary.

blic Health Department will be organized on a system of Bureaus
suitable men become available and funds permit, be in charge of
s of Health or First Class Health Officers, under the Directo
resent the following Bureaus will be established, *viz* :—

Administration.
pidemiology and Communicable Diseases.
boratories.
al Statistics.
lth Education.
ary Engineering, and
Health.

ministration will be directly under the Director of Health and w
ministration, will supervise and receive reports on Health organiz
icient administration of the Department.

Epidemiology and Communicable Diseases will study the diseases
e experimental measures for their control, deal with the control of epi
eive and publish reports on them and attend to such other duties as n

control programme sanctioned in Government Order No. G. 9085
the 28th January 1929, will be under the Bureau of Epidemiology for the p
cer in charge. It is expected that this work will be taken over by local H
anized in the infected districts.

reau of Laboratories will promote and carry out the routine examinations dem
prepare sera and vaccines; make chemical analyses; examine medico-legal c
ch and perform such other duties as may come within its purview. For the prese
the Public Health Institute, under a Superintendent with Assistant and Sub-Assis
its to assist him and the Vaccine Institute, under a Superintendent with Medical Gradu
It is the intention of Government eventually to combine the Vaccine and Serum Institu
under the Director of Agriculture with the Public Health Institute.

The Bureau of Vital Statistics will supervise the Registration of Births, Deaths, Marria
e the compilation of Vital Statistics in the State, and take all necessary measures to imp
stration; will receive, file and tabulate for publication all records of such occurrences an
ie effect of disease control methods from a statistical standpoint. The Vital Statistician
pointed in Government Orders No. G. 13409-11—San. 59-27-1, dated 1st June 1928, an
167-8—San. 7-28-14, dated the 27th November 1928, will constitute the staff of the Bu
Statistics.

(5) The Bureau of Health Education will carry out health propaganda work.

(6) The Bureau of Sanitary Engineering will report upon all public and private syst
water supplies and sewage disposal, examine all sources of water supply, and prepare proper ma
drawings for permanent record; will investigate all sources of pollution of water supplies; will
nise and report upon all town-planning, irrigation or other schemes which have any direct or
bearing on the health of the people; will investigate and report upon the engineering aspects of
control; will have supervision over the water-sheds for water supplies and over the sanitary
ments, ventilation and lighting of Schools, Jails and other public buildings.

(7) The Bureau of Rural Health will have supervision over, report upon and org
rural health administration of the State. The Rural Health Unit in the Mysore District, s
in Government Order No. G. 9694-6—San. 7-28-36, dated the 6th February 1929, will consti
the present, the staff of the Bureau of Rural Health.

As staff and funds become available, it is the intention of Government to e
other Bureaus such as Bureaus for Maternal and Infant Hygiene, Child H
Venereal Diseases, Tuberculosis, etc.

The Bureaus will work in close co-operation with the District and other
now carrying on health work or that may be organized in future and will hav
vision over the local work in their respective spheres of activity, organize it, a
it along proper lines.

6. *Local Organisation.*—As soon as local bodies can afford it, local h
will be transferred to Taluk and Municipal Health Units under Heal
These Health Officers will have direct charge of all health work in their ar
be responsible to and work under the direct control of District Health O
will be appointed as the development of Health Units warrants. P
appointment, the present arrangements will continue. The Director
requested to suggest suitable measures to enable Government to establis
of about six local Health Units per year.

The Health organization of the Bangalore and Mysore Cities and
field will continue as at present.

7. *Staff.*—For the proper carrying out of the plans herein outli
that there will be a need of adequately trained Health Officers.
